

Property Ministry- Property did not meet in June. Here are updates on recent activities:

- **Sanctuary Lighting Project-** Speelman Electric completed the equipment installation on 5/26/21. The controls vendor Audacy completed the system setup and commissioning on 6/11/21. The lighting system is now operational. Control switches have been installed in the Narthex (North coat closet), A/V Booth, Pulpit, and Organ.

Although we have not received final invoices for the project, Sally Saltzman has received pledges to cover the estimated project cost.

- **Bathroom rooftop exhaust fans-** Both fan belts failed and were replaced.
- **Elevator Door Problem-** ThyssenKrupp was contacted and replaced a blown fuse that prevented the elevator doors from retracting when sensing a person in the path of a closing door.
- **Failed GFIC Outlet replaced-** In preparation for the outdoor services, the GFIC outlet by the South entrance was replaced.
- **In Progress-** Property is looking to replace the existing picnic table because of its weathered condition.
- **Square One planting-** Square One has approved the purchase of a dwarf Lilac to be planted early fall in the parking lot strip. It will complement the existing Lilac at the other end of the strip (redbuds and sweetbay magnolias).
